

EXTRASEALER
The difference is black and white...

Perfection made simple

EXTRASEALER BLACK and WHITE wet-on-wet sealers bring new levels of speed and efficiency to the preparation and refinishing of new panels and are perfectly suited to rapid minor damage repairs, promoting optimum adhesion for the complete range of R-M topcoats.

... The ultimate greyscale sealers

- **Mix the shade you need for massive savings.** EXTRASEALER BLACK and EXTRASEALER WHITE are designed to be intermixed to provide no less than eight primer shades, or tinted with 5% **Uno HD** or **Onyx HD** mixing bases for topcoat savings of up to 45% and up to a 40% reduction in application time.

- **You need to be cost effective...** ...and with the increasing demands of insurance companies to reduce repair costs, EXTRASEALER reduces process times still further through wet-on-wet application, eliminating time consuming sanding prior to topcoat application.

- **Your bodyshop will profit from two hardeners.** D70 fast hardener for minor damage repairs and D80 normal hardener for larger areas, ensures EXTRASEALER dries in just 15 minutes at 20°C bringing your bodyshop the fastest possible throughput.

For the perfect match, use the **EXTRASEALER** greyscale guide!

EXTRASEALER BLACK and EXTRASEALER WHITE,
perfect greyscale shades for R-M topcoats.
